INTRODUCING

The AlumaFin7™ Evaporator Coil

Built with imagination, creativity, and technology as raw materials.

Enhanced surface and multi-louvered aluminum fin design supports the coil's ability to transfer heat efficiently

7mm grooved aluminum tubing for enhanced turbulence of refrigerant

Foil-faced insulation covers the internal casing to reduce cabinet condensation

Seal tight customized suction and liquid grommets for easy installation and removal

Single-piece access panel with tight seal helps to keep conditioned air from escaping

21-inch depth offers easy access in tight installations

Corrosion resistant thermoplastic drain pan features 'no water-retention' design

Redesigned drain pan provides outstanding condensate management

NEW
7mm 3/8" (9.525 mm)

More features and benefits:

- Compact and lightweight all-aluminum metallurgy for outstanding corrosion resistance
- Optimized for 410-A refrigerant
- Flowrator mounts on access panel for easy servicing
- Thick drain pan rail keeps drain pan secure
- Thermoplastic drain pan with secondary drain connections feature vertical-flow design allowing for upflow and downflow installations

AlumaFin7 is designed exclusively for high-efficiency Goodman® and Amana® brand heating and cooling products.
