CLEAN COMFORT®
INDOOR AIR ESSENTIALS

PURE. CLEAN. AIR.

Look for the full line of *Clean Comfort® Indoor Air Essentials.*

High-efficiency filtration

The Clean Comfort brand AM Series of media air cleaners are a more efficient and convenient way to clean the air in your home compared to standard furnace filters, which may need to be replaced monthly. They help to remove household dust, lint and other particulates passing through the return air ducts of your central heating and cooling system.

Media Air Cleaners

AM11-CleanFit*

The Clean Comfort CleanFit Series of MERV 11 media air cleaners are Intuitively designed with outer dimensions that match original equipment furnace and air handler cabinets.

AMB11-Builder*

The Clean Comfort AMB11 Series of MERV 11 media air cleaners are for vertical or horizontal residential applications and are offered in nominal sizes for adapting to various installations.

Accessory

AMP-BSRB*

The Clean Comfort Furnace Riser raises the furnace off of the ground and adds bottom return.

Solutions for additional applications

AM11-5RA*

The AM11-5RA Adjustable Inlet Duct opening replaces need for field forming transition, significantly reducing installation time.

AM11-3225-5*

The Clean Comfort brand AM Series of media air cleaners are a cost-effective way to filter the air in your home. These energy-efficient air cleaners help to remove household dust, and lint as these contaminants pass through the return air ducts of your central heating and cooling system.

AM11-5PP*

The AM11-5PP eliminates the need for a 90° duct adapter, as it works as a turning vane providing even distribution across the media filter.

Essentials vs Accessories

Indoor comfort in your home is about more than just adjusting the temperature on the thermostat. Many homeowners overlook the need for necessary components and systems that can improve the indoor air you breathe. Indoor air quality products and systems are quite frequently treated as accessories. We define them as indoor air essentials.

Whole-Home HEPA Filtration

A **Clean Comfort** brand AMHP HEPA Cleaner is installed on the return air duct of your central heating and cooling system. The AMHP draws in just a portion of the total air flow, treating it and returning it to your home's ductwork to with HEPA filtration standard.

The AMHP uses a two-stage air treatment process:

1. Prefiltration to MERV 11 quality, using an odor-absorbing activated carbon media filter
2. Ultra-high efficiency HEPA filtration, removing a minimum of 99.97% of all airborne particles 0.3 microns and larger

AMHP-250-UPD**

The AMHP-250 Air Cleaner is the most advanced air treatment system in the **Clean Comfort** brand family of products.

† One-Year Limited Warranty on lamp for AMHP-250 models.

Although the AMHP only treats a portion of your home's air at a time, it can treat on average all the air in a 2,000 square foot home in just over an hour of operation when running continuously on full speed.

High-Efficiency HEPA Filtration

The AMHP cleans air to the HEPA (High-Efficiency Particulate Air) quality standard by removing 99.97% of all particles as small as 0.3 microns.

AMHP-320-D*

The AMHP-320-D Duct Mount HEPA Air Cleaner uses true HEPA media material that is certified to remove 99.97% of all particles as small as 0.3 microns.

Optimal protection

Some people rely on portable "HEPA-like" filtration units to clean the air in their homes. But these units only clean the air in the proximity of the room where they're installed. The AMHP-250 is a whole-home system that's professionally installed and maintained as part of your home's central heating and cooling system.

PURE. CLEAN. AIR.

Whole-home indoor air quality solutions

Clean Comfort Indoor Air Essentials can improve the quality and comfort of your home's indoor air. Components can be installed on virtually any brand of HVAC equipment in any home or installation. (For illustration purposes only, we have shown a basement installation.)

Our complete family of Clean Comfort products improves indoor air quality:

Filtration

Air filtration systems capture up to 95% of particles ranging in size down to 0.3 micron and keep them from recirculating back into your home's air.

- 5-Stage Air Treatment
- Hepa Air Cleaner
- Media Air Cleaner
- Electronic Air Cleaner
- Hybrid Air Cleaner
- Replacement Filters

Humidity Control

Dehumidifiers and humidifiers work with the home's heating and cooling system to help maintain a comfortable humidity level in every room.

- Whole-Home Humidifier
 - Bypass Evaporative Humidifier
 - Steam Humidifier

Dehumidification

Dehumidifiers work with the home's heating and cooling system to help maintain a comfortable humidity level in every room.

- Whole-Home Dehumidifier

Purification

Air purification systems are attached to the furnace or air handler, contaminants are deactivated before the air is recirculated back into the home.

- In-Duct Air Purifier
- Coil Purifier
 - For Furnaces
 - For Air Handlers

Ventilation

Ventilation systems replace stale indoor air with outdoor air — providing the fresh-air feel of an open window, with minimal heat/energy loss.

- Heat Recovery Ventilator (HRV)
- Energy Recovery Ventilator (ERV)

Additional information

Before purchasing this appliance, read important information about its estimated annual energy consumption, yearly operating cost or energy efficiency rating that is available from your retailer.
