## Energy Guide Labels Currently in Effect

SUBJECT TO REGIONAL STANDARDS

**ENERGYGUIDE**

Central Air Conditioner Cooling Only Split System

Efficiency Rating (SEER)\* **XX.X-XX.X**

Notice: The installed system must meet minimum federal regional efficiency standards. See [productinfo.energy.gov](http://productinfo.energy.gov) for certified coil combinations.

Minimum Standards		
	North	Southwest
SEER <sup>1</sup>	13	14
EER <sup>2</sup>		12.2
EER <sup>3</sup>		11.7

<sup>1</sup> Units with rated capacity of less than 45,000 Btu/h  
<sup>2</sup> Units with rated capacity equal to or greater than 45,000 Btu/h

CAN BE INSTALLED ANYWHERE

**ENERGYGUIDE**

Central Air Conditioner Cooling Only Split System

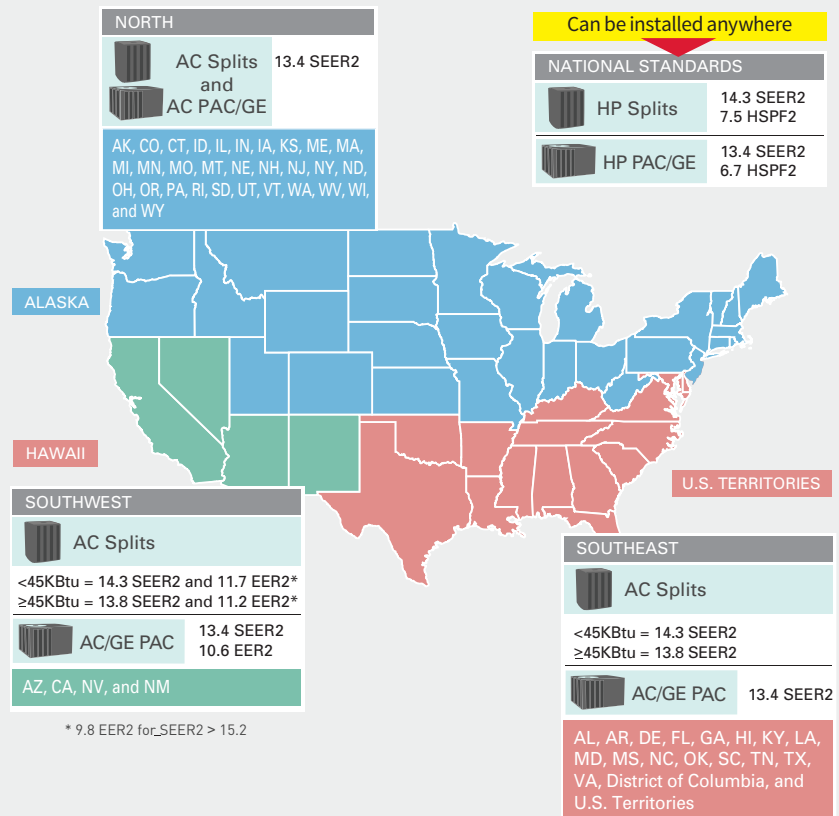

Efficiency Rating (SEER)\* **XX.X-XX.X**

Notice: Federal law allows this unit to be installed in all U.S. states and territories.

## Did you know about the energy efficiency standards for HVAC products?

The U.S. Department of Energy (DOE) sets energy efficiency standards for air conditioners, heat pumps, and other HVAC products. For 2023, the DOE applied regional minimum efficiency standards to Split System and Package Air Conditioners. Today, the DOE minimum efficiency standards include both national standards (which are based on the date of manufacture) and regional standards (which are based on the date of installation).

THE MAP SUMMARIZES THE NATIONAL AND REGIONAL EFFICIENCY STANDARDS.

## ASSESSING YOUR OPTIONS

Most likely, if you are reading this, the central heating and cooling system in your home is not functioning properly. With the help and support of your local **Amana**® brand dealer, you are preparing to make the decision whether it's best to repair or replace the old heating and/or cooling system. As you prepare to make this decision be certain to consider these options:

- Energy-efficient performance
- Enhanced indoor comfort levels
- Consistent indoor comfort
- Anticipated years of service expected from new unit
- Costs associated with repairing your current system
- Cost of purchasing a new heating and cooling system

## Amana<sup>®</sup> brand products

Here are some examples of the limited warranty\* protection coverage:

- Lifetime Compressor Limited Warranty\* on select models, good for as long as the purchaser owns his/her home.
  - If the compressor fails while in use at the registered, single-family homeowner's residence, a new compressor will be provided at no charge.
- Lifetime Heat Exchanger Limited Warranty\* on select gas furnace models, good for as long as the purchaser owns his/her home.
  - If the heat exchanger fails in use at the registered, single-family homeowner's residence, a new heat exchanger will be provided at no charge.
- 10-Year Parts Limited Warranty\*
  - Included on all residential heating and cooling products regardless of SEER or AFUE rating.

### LIMITED WARRANTY\* PROTECTION

\* Complete warranty details available from your local dealer or at [www.amana-hac.com](http://www.amana-hac.com). To receive the Lifetime Unit Replacement Limited Warranty, the Lifetime Heat Exchanger Limited Warranty (in each case, good for as long as you own your home), and the 10-Year Parts Limited Warranty, online registration must be completed within 60 days of installation. Online registration is not required in California or Quebec. The duration of warranty coverages in Texas differs in some cases.

**Asure**<sup>™</sup>  
EXTENDED SERVICE PLAN

Ask your dealer for full details.

### Additional information

Before purchasing this appliance, read important information about its estimated annual energy consumption, yearly operating cost, or energy efficiency rating that is available from your retailer.

## Deciding factors

Here are some factors to consider as you decide whether to repair or replace your current heating and cooling system.

### AFUE

Annual Fuel Utilization Efficiency (AFUE) ratings are regulated by the Department of Energy. The higher the AFUE rating, the greater its potential energy savings. For example, an **Amana** brand gas furnace with an AFUE of 98% indicates that for every \$1.00 of fuel entering the furnace, only two cents is not fully utilized.

### SEER

Seasonal Energy Efficiency Rating is the term used to identify the air-cooling efficiency rating of a heat pump or air conditioner. The higher the rating number, the more efficient it is designed to operate.

### HSPF

Heating Season Performance Factor identifies the air-heating efficiency of a heat pump. The higher the rating number, the more energy efficient the heat pump performs.

## Financing

Often times, a decision is made to repair an older, less efficient unit instead of replacing it with a newer, energy-efficient unit due to the high cost of a new system. Consumer financing can be an effective tool to fit a new system into your budget without breaking the bank while unlocking savings through reduced energy usage when compared to older, less-efficient units. Moreover, consumer financing can cover the cost of an Asure<sup>SM</sup> extended service plan to minimize any out of pocket expenses you face for the term of the extended service plan. Ask your dealer on whether consumer financing makes sense for your family.
