

Before purchasing this appliance, read important information available from your retailer about its estimated annual energy consumption, yearly operating cost or energy efficiency rating.

Use outside air to cool your room and save energy with **Amana** brand configurable Smart Vent and Economizer PTACs.

The new **Amana** brand Smart Vent allows you to choose how you bring outside air into hotel rooms. Adjustable settings allow you to select hot, cold or humidity limits of the outside air you introduce into the room.

When the outside air is cool and dry enough to maintain room temperatures that are comfortable for guests without the compressor, you have the ability to bring the cooler outside air in to cool the guestroom, and therefore save on your energy consumption (compared to PTACs without this feature) and stretch your dollars.

You can ultimately maintain a comfortable room environment for your guests and save money with the Economizer capability.

Smart Vent

Ability to control power vent fan and/or power vent door based on:

- Hot Limit
- Cold Limit
- Humidity Limit

Economizer

- Bring outdoor air in to cool your room when outdoor temperatures are right
- Configurable temperature delta for activation between guest room and outdoor make-up air
- Optional compressor assist to allow both standard PTAC cooling and outside air cooling when needed

Call your **Amana** brand PTAC sales representative at **800-647-2982** for complete details.
