AIR HANDLER UNITS CURRENT R-410A & NEW R-32 PRODUCTS

TRUST THE EXPERTS.

If you have a heat pump outside your home, the air handler is likely the indoor component comprising your two-part, split system that keeps the indoor temperature of your home comfortable all year long. Most often, air handlers are located in the attic, basement or a dedicated closet, and may closely resemble the shape of a gas furnace. As its name suggests, an air handler “handles” the air inside your home and delivers warm or cool indoor air throughout your entire home. What would we do without delivery!
